Auditory processing in the brain

Nowadays many people use portable music players. Here, we investigated the long term effects of portable music players on human brain activity by means of magnetoencephalography. Our results indicated that portable music players can have positive (1,2) and negative (3) impacts on daily life through brain activity changes.

CV

- 1993 - 1999 School of Medicine, Osaka University Awarded the degree of BSc in medicine.
- 1999 - 2000 Resident in Otorhinolaryngology and Sensory Organ Surgery, Osaka University Hospital, Osaka, Japan.
- 2000 - 2001 Resident in Osaka Seamen's Insurance Hospital, Osaka, Japan.
- 2001 – 2005 Department of Otorhinolaryngology and Sensory Organ Surgery, Graduate School of Medicine, Osaka University Awarded the degree of PhD in medicine
- 2005 – 2010 Post Doctoral Fellow in the Institute for Biomagnetism and Biosignalanalysis, Westfalian Wilhelms-University, Muenster, Germany.
- 2010 – Present Associate Professor in the Department of Integrative Physiology, National Institute for Physiological Sciences, Okazaki, Japan.
