

# The 2nd NIBB - Princeton Symposium "Imaging and Quantitative Biology" was held at NIBB (October 28-30, 2019)

更新日：2020年8月24日更新

The second NIBB-Princeton Joint Symposium entitled 'Imaging and Quantitative Biology' was held on October 28-30th, 2019 at the Okazaki Conference Center. Although the scientific sessions covered a rather broad spectrum of biological phenomena, the key concept 'Imaging and Quantitative Biology' was underlying all the presentations. Eighty-five participants, who were researchers from the various institutes and research centers of NINS, as well as those from other universities enjoyed lively discussions during poster presentations over the three days. In particular, four professors from Princeton University gave insightful comments to the presenters and led the discussions.
